8. Risk Factors

- **Interest Rate Uncertainty**: Central bank commentaries continue to inject volatility into global bond yields, impacting growth assets like tech and cryptocurrencies.
- **Geopolitical Backdrops**: Regional tensions could disrupt commodity supplies, particularly gold and silver pricing.
- **Overextended Crypto Momentum**: Crypto RSI values show rapid spikes, presenting a near-term pullback risk if key supports are broken.

9. Trading Opportunities

- **NIFTY Breakout Play**: Monitor NIFTY close to the resistance levels for potential momentum extension.
- **Gold Range Trade**: Accumulate Gold near support levels with strict stop losses below the 50-day moving average.
- **Bitcoin Consolidation**: Cryptocurrencies are showing healthy pullbacks near the 20-day SMA, presenting accumulation entries.

10. Tomorrow Outlook

We anticipate a consolidation bias in the indices ahead of upcoming macroeconomic indicators. Crypto and commodities are expected to trade in tight channels. Key pivot support levels must be defended by the bulls to retain overall positive structures.
