

Daily Market Intelligence Report for 2026-06-07

1. Executive Summary

The market witnessed a mixed trend today, with the NIFTY (^NSEI) and BSESN (^BSESN) closing in the red, while the BANKNIFTY (^NSEBANK) managed to end the day with marginal gains. The commodity space saw significant declines, with Gold (GC=F) and Silver (SI=F) plummeting 2.47% and 6.34%, respectively. In the cryptocurrency space, Bitcoin (BTC-USD) and Ethereum (ETH-USD) showed resilience, closing 1.45% and 3.55% higher, respectively. The report will delve into the technical analysis of these assets, highlighting key support and resistance levels, momentum indicators, and potential trading opportunities.

2. NIFTY Analysis

The NIFTY (^NSEI) closed 0.21% lower at 23,366.70, with the RSI at 39.9, indicating bearish momentum. The price remains below the 50-day moving average, suggesting a bearish structure. Immediate resistance lies near 24,482.10, while support remains around 23,151.50. The MACD is in negative territory, further reinforcing the bearish outlook. Traders should watch for a potential breakdown below the support level, which could lead to a further decline towards 22,500. On the other hand, a bounce back above the resistance level could lead to a short-term rally towards 25,000.

3. BANKNIFTY Analysis

The BANKNIFTY (^NSEBANK) closed 0.35% higher at 54,496.25, with the RSI at 54.3, indicating neutral momentum. Although the price remains below the 50-day moving average, suggesting a bearish structure, the MACD is showing signs of convergence, which could lead to a potential bullish crossover. Immediate resistance lies near 56,334.15, while support remains around 52,783.45. Traders should watch for a potential breakout above the resistance level, which could lead to a rally towards 58,000. On the other hand, a breakdown below the support level could lead to a decline towards 50,000.

4. Gold Analysis

Gold (GC=F) closed 2.47% lower at 4,365.30, with the RSI at 32.2, indicating bearish momentum. The price remains below the 50-day moving average, suggesting a bearish structure. Immediate resistance lies near 4,765.20, while support remains around 4,336.60. The Bollinger Bands are indicating increased volatility, with the upper band at 4,553.69 and the lower band at 4,401.69. Traders should watch for a potential bounce back above the support level, which could lead to a short-term rally towards 4,500. On the other hand, a breakdown below the support level could lead to a further decline towards 4,200.

5. Silver Analysis

Silver (SI=F) closed 6.34% lower at 69.10, with the RSI at 28.4, indicating oversold conditions. The price remains below the 50-day moving average, suggesting a bearish structure. Immediate resistance lies near 88.89, while support remains around 67.70. The MACD is in negative territory, further reinforcing the bearish outlook. Traders should watch for a potential bounce back above the support level, which could lead to a short-term rally towards 75. On the other hand, a breakdown below the support level could lead to a further decline towards 65.

6. Bitcoin Analysis

Bitcoin (BTC-USD) closed 1.45% higher at 61,752.01, with the RSI at 18.1, indicating oversold conditions. The price remains below the 50-day moving average, suggesting a bearish structure. Immediate resistance lies near 78,100.56, while support remains around 59,108.92. The Bollinger Bands are indicating increased volatility, with the upper band at 77,301.12 and the lower band at 58,343.37. Traders should watch for a potential

breakout above the resistance level, which could lead to a rally towards 80,000. On the other hand, a breakdown below the support level could lead to a further decline towards 55,000.

7. Ethereum Analysis

Ethereum (ETH-USD) closed 3.55% higher at 1,624.51, with the RSI at 19.3, indicating oversold conditions. The price remains below the 50-day moving average, suggesting a bearish structure. Immediate resistance lies near 2,154.22, while support remains around 1,506.51. The MACD is showing signs of convergence, which could lead to a potential bullish crossover. Traders should watch for a potential breakout above the resistance level, which could lead to a rally towards 2,500. On the other hand, a breakdown below the support level could lead to a further decline towards 1,400.

8. Risk Factors

The market is currently experiencing increased volatility, with the Bollinger Bands indicating expanded ranges for most assets. The RSI is also indicating oversold conditions for several assets, which could lead to potential bounces. However, the MACD is in negative territory for most assets, suggesting that the bearish momentum is still intact. Traders should be cautious of potential whipsaws and should consider hedging their positions to mitigate risk.

9. Trading Opportunities

Based on the technical analysis, potential trading opportunities include:

- Long Bitcoin (BTC-USD) above 61,000, with a target of 65,000 and a stop-loss at 58,000.
- Long Ethereum (ETH-USD) above 1,600, with a target of 1,800 and a stop-loss at 1,500.
- Short Gold (GC=F) below 4,400, with a target of 4,200 and a stop-loss at 4,600.
- Short Silver (SI=F) below 70, with a target of 65 and a stop-loss at 75.

10. Tomorrow Outlook

The market is expected to remain volatile, with the potential for further declines in the commodity space. The cryptocurrency space is showing signs of resilience, with potential breakouts above key resistance levels. Traders should remain cautious and consider hedging their positions to mitigate risk. The NIFTY and BANKNIFTY are expected to remain range-bound, with potential breakouts above key resistance levels. The BSESN is expected to remain under pressure, with potential declines towards 72,000.
