We expect Ethereum to consolidate around the current levels, with a potential upside target of 1,800.

8. Risk Factors

The market is currently facing several risk factors, including global economic uncertainty, geopolitical tensions, and commodity price volatility. These factors may impact the market's performance in the short term. Additionally, the overbought conditions in the BANKNIFTY and the bearish momentum in Gold and Silver may lead to a correction in the market.

9. Trading Opportunities

Based on our analysis, we see trading opportunities in the NIFTY and BANKNIFTY, with potential upside targets of 24,500 and 59,000, respectively. We also see opportunities in Bitcoin and Ethereum, with potential upside targets of 65,000 and 1,800, respectively. However, we advise caution in Gold and Silver, as they may decline further.

10. Tomorrow Outlook

We expect the market to consolidate around the current levels, with a potential upside bias. The NIFTY and BANKNIFTY may trade in a range of 23,500-24,500 and 56,000-59,000, respectively. Gold and Silver may decline further, while Bitcoin and Ethereum may trade in a range of 60,000-65,000 and 1,600-1,800, respectively. We advise investors to remain cautious and to keep a close eye on the market's performance.
