

Executive Summary

The market witnessed a mixed trend on July 4, 2026, with the NIFTY (^NSEI) and BSESN (^BSESN) indices closing higher, while the BANKNIFTY (^NSEBANK) index ended in the red. The commodity segment saw a significant surge in gold (GC=F) and silver (SI=F) prices, while the cryptocurrency space witnessed a modest gain in bitcoin (BTC-USD) and ethereum (ETH-USD) prices. The technical indicators suggest that the market is due for a correction, with the RSI indicating overbought conditions in the NIFTY and BSESN indices.

NIFTY Analysis

The NIFTY (^NSEI) index closed 0.39% higher at 24,270.85, with the RSI at 71.3, indicating overbought conditions. The price remains above the 50-day moving average, suggesting a bullish structure. The immediate resistance lies near 24,378.15, while the support remains around 23,784.95. The MACD is at 46.33, indicating a strong bullish momentum. The Bollinger Bands are at 24,216.73 (upper) and 23,704.60 (lower), suggesting a moderate level of volatility. We expect the NIFTY to consolidate around the 24,000 level, with a potential target of 24,500 in the short term.

BANKNIFTY Analysis

The BANKNIFTY (^NSEBANK) index closed 0.16% lower at 57,938.50, with the RSI at 59.5, indicating strong bullish momentum. The price remains above the 50-day moving average, suggesting a bullish structure. The immediate resistance lies near 58,706.05, while the support remains around 57,074.90. The MACD is at 155.07, indicating a strong bullish momentum. The Bollinger Bands are at 58,442.87 (upper) and 56,962.17 (lower), suggesting a moderate level of volatility. We expect the BANKNIFTY to bounce back from the support level, with a potential target of 59,000 in the short term.

Gold Analysis

The gold (GC=F) price closed 1.81% higher at 4,187.30, with the RSI at 63.1, indicating strong bullish momentum. The price remains above the 50-day moving average, suggesting a bullish structure. The immediate resistance lies near 4,377.00, while the support remains around 3,962.50. The MACD is at -26.96, indicating a bearish divergence. The Bollinger Bands are at 4,167.73 (upper) and 3,942.79 (lower), suggesting a moderate level of volatility. We expect the gold price to consolidate around the 4,100 level, with a potential target of 4,200 in the short term.

Silver Analysis

The silver (SI=F) price closed 3.58% higher at 62.81, with the RSI at 58.3, indicating strong bullish momentum. The price remains below the 50-day moving average, suggesting a bearish structure. The immediate resistance lies near 70.95, while the support remains around 57.03. The MACD is at -1.18, indicating a bearish divergence. The Bollinger Bands are at 62.67 (upper) and 56.33 (lower), suggesting a moderate level of volatility. We expect the silver price to bounce back from the support level, with a potential target of 65.00 in the short term.

Bitcoin Analysis

The bitcoin (BTC-USD) price closed 0.12% higher at 62,617.49, with the RSI at 66.2, indicating strong bullish momentum. The price remains above the 50-day moving average, suggesting a bullish structure. The immediate resistance lies near 65,544.00, while the support remains around 57,747.77. The MACD is at -79.33, indicating a bearish divergence. The Bollinger Bands are at 62,232.84 (upper) and 57,888.44 (lower), suggesting a moderate level of volatility. We expect the bitcoin price to consolidate around the 60,000 level, with a potential target of 65,000 in the short term.

Ethereum Analysis

The ethereum (ETH-USD) price closed 0.69% higher at 1,768.71, with the RSI at 77.2, indicating overbought conditions. The price remains above the 50-day moving average, suggesting a bullish structure. The immediate resistance lies near 1,776.83, while the support remains around 1,510.51. The MACD is at 16.34, indicating a strong bullish momentum. The Bollinger Bands are at 1,729.61 (upper) and 1,484.03 (lower), suggesting a moderate level of volatility. We expect the ethereum price to consolidate around the 1,700 level, with a potential target of 1,800 in the short term.

Risk Factors

The market is due for a correction, with the RSI indicating overbought conditions in the NIFTY and BSESN indices. The global economic uncertainty and geopolitical tensions may also impact the market sentiment. The investors should be cautious and consider hedging their positions to mitigate potential losses.

Trading Opportunities

The trading opportunities exist in the NIFTY and BANKNIFTY indices, with potential targets of 24,500 and 59,000, respectively. The gold and silver prices are also expected to bounce back from the support levels, with potential targets of 4,200 and 65.00, respectively. The bitcoin and ethereum prices are expected to consolidate around the 60,000 and 1,700 levels, respectively, with potential targets of 65,000 and 1,800, respectively.

Tomorrow Outlook

The market is expected to be volatile, with the NIFTY and BANKNIFTY indices potentially consolidating around the 24,000 and 58,000 levels, respectively. The gold and silver prices are expected to bounce back from the support levels, while the bitcoin and ethereum prices are expected to consolidate around the 60,000 and 1,700 levels, respectively. The investors should be cautious and consider hedging their positions to mitigate potential losses. The market sentiment is expected to be driven by the global economic uncertainty and geopolitical tensions, and the investors should be prepared for any unexpected events.
