Risk Factors

The market is currently facing several risk factors, including global economic uncertainty, geopolitical tensions, and rising inflation. The recent surge in commodity prices has also added to the risk factors, as it may lead to higher production costs and reduced consumer spending. Additionally, the cryptocurrency market is highly volatile and subject to regulatory risks.

Trading Opportunities

Based on our analysis, we see trading opportunities in the following assets:

- ^NSEI: Buy on dips around 24,200, with a target of 24,500.
- ^NSEBANK: Buy on dips around 56,500, with a target of 58,000.
- Gold: Buy on dips around 4,300, with a target of 4,500.
